

IKRAM RANA / THE AI BUSINESS OPS KIT

WORKSHEETS & TRACKERS

Print these. Fill them in by hand. Pin the ones that matter.

Voice profile / ops audit / SOP builder / follow-up tracker
onboarding checklist / friday review / scorecard

My Voice Profile

Run Prompt 00, paste the result below, then edit until it's true. Keep this page next to your keyboard until it lives in your AI's custom instructions.

My voice profile (from AI, then edited by me)

Words and phrases I always use

Words I never use (the ban list)

■ STARTER BAN LIST

leverage / synergy / circle back / touch base / "I hope this email finds you well" / more than one exclamation mark per message

Where your time actually goes

Part A: list the last 5 operational tasks that took over 20 minutes each.

TASK	TIME TAKEN	AI COULD DRAFT V1?	TEMPLATE COULD HANDLE?	COULD BE SCHEDULED?
		Y / N	Y / N	Y / N
		Y / N	Y / N	Y / N
		Y / N	Y / N	Y / N
		Y / N	Y / N	Y / N
		Y / N	Y / N	Y / N

Part B: the math

____ hrs ADMIN PER WEEK	x \$ ____ MY HOURLY RATE	x 50 WEEKS	= \$ _____ PER YEAR
---	--	----------------------------------	---

Part C: the pick

Circle the one task above with the most Y answers. That's your first system. It maps to Module: ____

One process, out of your head

Print one per SOP. Brain-dump by hand or voice, then run Prompt 09.

Process name

The brain dump (messy is correct)

[FILL IN] gaps AI flagged

DONE WHEN

- ☐ SOP generated with Prompt 09 and gaps filled
- ☐ Saved in my SOP Library with a category and date
- ☐ Someone else could follow it without asking me anything

The Notion version is one click in your Bonus Templates file. This page is for desk-and-pen operators. Check it every Monday.

■ THE CADENCE

Touch 1: within 24h / Touch 2: +3 days / Touch 3: +7 days / Touch 4: +14 days / Touch 5: +30 days. Set the next date the moment you send.

Every client, same experience

Print one per new client, or copy it into your task system. Client name:

_____ Signed on: _____

THE SEQUENCE

- ☐ Welcome email sent (within 1 hour of signing)
- ☐ Kickoff call scheduled, calendar invite with meeting link sent
- ☐ Kickoff Prep email sent (24 hours before the call)
- ☐ Kickoff call held, notes captured
- ☐ Post-Kickoff Recap email sent (same day as the call)
- ☐ Week 1 Check-In email scheduled (7 days after kickoff)
- ☐ Client added to tracker with next touchpoint dated

Notes for this client

■ THE TRIGGER

My email 1 fires when: _____ (contract signed / payment received / other). If you can't fill that blank, go back to Module 2, step 4.

The Friday 30

Week of: _____. Thirty minutes, every Friday. This page is the maintenance schedule for your whole OS.

RUN THE CHECKS

- ☐ Inbox at or near zero using the daily block?
- ☐ All due follow-ups sent, tracker dates updated?
- ☐ Any client mid-onboarding, next email queued?
- ☐ Any AI draft I heavily rewrote? Fix that prompt or my Voice Profile.
- ☐ Next week's Monday Ops Hour on the calendar?

THE SYSTEM-BUILDER QUESTION

What did I do manually this week that I'll have to do again?

Now brain-dump it into an SOP or template. Ten minutes. That's how the OS grows itself: one new system a week is 50 a year.

Hours saved this week (honest estimate): _____

Month one, measured

One row per week, one line per Friday review. Numbers, not vibes.

WEEK	INBOX BLOCKS (/5)	FOLLOW-UPS SENT	SOPS (TOTAL)	HOURS SAVED	NEXT THING TO SYSTEMATIZE
1					
2					
3					
4					

_____ hrs TOTAL SAVED, MONTH 1	x \$ _____ MY HOURLY RATE	= \$ _____ WHAT THIS MONTH WAS WORTH
--	---	--

■ KEEP IT VISIBLE

Write the final number somewhere you'll see it in week six, when a busy stretch tempts you to abandon the rhythm. The number is the argument.
